

## AC-15 ANTI-FREEZE ADJUSTER

AC-15 is a Mono Ethylene Glycol Anti-Freeze Adjuster for Use with Inhibited Glycol Coolants  
 Useful for many Industrial Heating and Cooling Applications and Processes

### PRODUCT INFORMATION

High Purity Ethylene Glycol for Use with Inhibited Coolants, Heat Transfer Systems, and Industrial Heater / Cooler Applications.

AC-15 is Water Soluble & Hygroscopic and can be Used in Heat Transfer Fluid Raises the Boiling Point and Lowers the Freeze Point. For Application Specific Information Contact DGL Technical Support.

### TYPICAL PROPERTIES

<b>Appearance</b>	Clear Mobile Liquid	
<b>pH (Undiluted):</b>	N/A	
<b>Glycol by Weight (gm/L):</b>	1,113.5	
<b>Density:</b>	1.11 - 1.12 kg/L	
<b>Freezing Point (58% Glycol):</b>	-48°C (58% by Vol.)	
<b>Freezing Point (100% Glycol):</b>	-13°C (100% by Vol.)	
<b>Boiling Point:</b>	197.80°C (100% by Vol.)	
<b>DG Class:</b>	Non-Dangerous Goods	
<b>Hazardous:</b>	Yes
