

AC-90 DEMINERALISED WATER

AC-90 Commercial Grade Demineralised Water (H₂O)

Predominately Used for Cooling Systems, Industrial Heat Exchangers, Batteries, Household, & Laboratory Applications

PRODUCT INFORMATION

AC-90 Demineralised Water is Specially Purified to Remove Most, Mineral and Salt Ions, Such as Calcium, Magnesium, Sodium, Chloride, Sulphate, Nitrate and Bicarbonate.

Also Known as Deionised Water, DI, RO, or Demin Water.

Typical Uses Include Laboratory Applications, Wash Water for Electronics, Internal Combustion, EV, & Industrial Cooling Systems, Laser Cutting, Steam Irons & Pharmaceutical Manufacturing.

Exceeds the Water Quality Limits of **ASTM D6210**.

TYPICAL PROPERTIES

Appearance:	Clear, transparent liquid
pH at 25 °C:	5 - 7
Specific Electrical Conductivity at 25 °C, mS/m:	0.1
Dry residue after evaporation, mg/dm³ oxygen:	1.5
Density at 25 °C:	1.00
Colour:	Clear
Boiling Point	App 100°C
Flash point:	Not flammable
Volatile Organic Compounds	0% w/w

SAFETY INFORMATION

Poisons Schedule Not scheduled

Dangerous Goods Not classified as Dangerous Goods

GHS Classification Not hazardous

NON DG
