

AC-31 TYRE SHINE (Non Silicone)

An effective non silicone tyre shine manufactured With an organic water / ethanol base

AC-31 is ideal for situations where silicone tyre shines are not suitable such as smash and panel repair shops or around areas where silicone poses a slip risk.

PRODUCT INFORMATION

AC-31 is a non silicone water based tyre treatment and rejuvenator. This product is ideal for situations where a quick and cost effective spruce up is required.

AC-31 is popular with automotive paint and panel repairs shops due to the silicone tyre shines causing paint finish problems. Silicone can also cause floor surfaces to become slippery over time if repetitively used in the same area. AC-31 will typically not cause surfaces to become slippery.

AC-31 will not have the longevity of a silicone tyre shine and its effective tyre life is shortened in wet weather.

May be sprayed, painted or wiped onto surfaces. Best results are achieved by spraying surface evenly and allowing 15 minutes to dry. Should faster drying be necessary wiping with a clean rag after spraying may be necessary.

This may leave a slightly less shiny finish. Austech 1 Litre Pump-up Sprays are recommended for even effective application.

TYPICAL PROPERTIES

Appearance:	Blue Liquid
Odour:	Strong alcohol odour
Solubility:	Soluble in water
Flammable:	Flammable
Hazard Class:	Hazardous Substance
DG Code:	Class 3 flammable (Packing Group III)
Specific Gravity:	0.97
Boiling Point:	80 -150°C
