

AC-33 SILICONE TYRE SHINE

Highly reflective silicone tyre shine Manufactured using a blend of silicones

AC-33 is a high quality silicone / solvent tyre shine to give a highly reflective shine to tyres. Also can be used to treat bumpers and trim.

PRODUCT INFORMATION

AC-33 is a high quality silicone tyre treatment. It is a specially formulated blend of different types of silicone to enhance light reflectivity and broad coverage

AC-33 is formulated with silicones that provide a consistent, shiny finish when applied correctly that will rejuvenate tyres and aged vinyl. It resists water and outlasts most tyre shine products available. It is also economical and efficient to use.

May be sprayed, painted or wiped onto surfaces. Best results are achieved by spraying surface evenly and allowing 15 minutes to dry. Should faster drying be necessary wiping with a clean rag after spraying may be necessary. This may leave a slightly less shiny finish. Austech 1 Litre Pump-up Sprays are recommended for this application.

NOTE: The appearance of tyre shine after application to the tyre will vary depending upon the age and condition of the tyre. Newer tyres can repel the silicone due to the presence of coating from manufacturing and older tyres can soak up the silicone very readily thereby diminishing the gloss of the finish.

TYPICAL PROPERTIES

Appearance:	Clear Liquid
Specific Gravity:	0.72 - 0.75
Odour:	Hydrocarbon Solvent
Solubility:	Insoluble
Flammable:	Highly Flammable
Hazardous:	Yes
DG Class:	Class 3 Flammable (Packing Group II)
Flash Point:	< -15°C
