

AC-90 DEMINERALISED WATER

Specially Purified water

Demineralised water for the use in industrial and scientific purposes

PRODUCT INFORMATION

AC-90 Demineralised Water is specially purified water that has had most or all of its mineral and salt ions removed, such as Calcium, Magnesium, Sodium, Chloride, Sulphate, Nitrate and Bicarbonate. It is also known as Deionised water, DI or Demin water. AC-90 Demineralised Water is NOT generally used for drinking water, as it is the minerals in potable water that provide the health benefits and taste. It also tends to remove minerals from food and electrolytes from the body, so it is not usually recommended for drinking or cooking.

TYPICAL USES

Some of the major and common uses are:

- Laboratory applications and testing e.g. autoclaves
- Wash water for computer chip manufacture, and other microelectronics
- Automotive uses e.g. lead-acid batteries and cooling systems
- High pressure boiler feed
- Laser cutting
- Steam irons and steam raising applications
- Pharmaceutical manufacturing
- Cosmetics ('aqua' often refers to DI water)
- Aquariums
- Fire extinguishers

TYPICAL PROPERTIES

Appearance	Clear - Water
Odour:	No Odour
DG Class:	Non Dangerous Goods
Hazardous:	No

Non DG
