

COMPRESSED AIR SPRAYERS

HINTS FOR USE:

1. Unscrew pump from bottle.
2. Fill the bottle to the maximum level indicator. Use clean liquids free from solids to ensure a clean nozzle and fine spray pattern.
3. Insert pump assembly and screw very tightly so airtight seals can maintain sufficient pressure.
4. Action pump using approximately 30 strokes for 800 millilitres - more if tank contains less.
5. Press trigger and adjust nozzle for required spray (fine mist ➡ spray)

MAINTENANCE:

- *Periodically grease pump rod.*
 - *Immediately after use, clean the pump sprayer with clean water.*
 - *Always release pressure in the unit before storage.*
